General Purpose, High-Speed Vertical Machining Centers

The Hurco VM CNC vertical milling machines offer powerful machining with a compact footprint, and absolutely the best value on the market. These CNC machining centers are the perfect combination of size, speed, and functionality. The larger work cube provides impressive X travel while not demanding excessive floor space. The high-speed machining center provides a superior surface finish and more accurate parts. Exceptional cutting feed rates are achieved with patented high-speed motion technology - resulting in the fastest cut with the best surface finish.
